influencing key beliefs. NLP provides a model of the mind and a set of behavioral tools that can allow people to unlock some of the hidden mechanisms of beliefs and belief systems.

Changing Belief Systems With NLP by Robert Brian Dilts ...

Hardcover: 221 pages Our beliefs are a very powerful influence on our behavior. It is widely understood that if someone really believes he/she can do something, he/she will do it; but if he/she believes something is impossible, no amount of effort will convince him/her that it can be accomplished. Our beliefs about ourselves and what is possible greatly affected our day to day effectiveness.

How to Change Beliefs Using NLP Submodalities is framed in the template submodalities. If the unconscious mind has approved the change and you have done accurate work, the meaning of the experience will shift to reflect the qualities associated with the template submodalities. You might need to repeat the shift two or three times to automate it.
