A major component of these communication systems is composed of connexin (Cx)-containing channels including gap junctions (GJs), tunneling nanotubes (TNTs), and hemichannels (HCs). There are hundreds of reports about the role of Cx-containing channels in the pathogenesis of cancer, and most of them demonstrate a downregulation of these proteins.

The Novel Roles of Connexin Channels and Tunneling ...

Spending on prescription drugs in the United States is on the rise and is projected to outpace growth in other parts of the health care sector in 2018. Limited public data on how much various payers and supply chain intermediaries pay for prescription drugs, as well as a lack of consensus on a single metric for drug expenditures, presents methodological challenges in measuring
