Giraffe: Biology, Behaviour and Conservation: Dagg, Anne ...

The Giraffe Conservation Foundation has a very clear mission, which is to give giraffes a sustainable future and a protected and safe natural habitat. They support research on ecology and conservation, as well as promoting the importance of the care of giraffes worldwide, among many other tasks of great importance.

Giraffe Conservation - Giraffe Facts and Information

In captivity, giraffes can live a little longer than in the wild, as some individuals have reached the age of 40 years. Females live 25% more than males. Odd behaviors. A giraffe mother is very concerned and devoted to its offspring, but in the wild, some have left their calves in the vegetation at the expense of the predators; This is a strange and uncommon behavior not regular of the species.

Giraffe Reproduction - Giraffe Facts and Information

Covers fossil history, taxonomy, genetics, physiology, biomechanics, behavior, ecology, and conservation Includes genetic analysis of five of the six subspecies of modern giraffes Includes giraffe network studies from Laikipia Kenya, Etosha National Park, Namibia and Samburu National Reserve, Kenya

The Giraffe | Wiley Online Books

There are far too few studies of behaviour, each of which is incredibly labour-intensive and expensive. As well, it has already been shown, as we shall see in this chapter, that behaviour is shaped in part by local environments and by group composition. In this chapter it is assumed that giraffe of all races behave in more or less the same way.
