I printed off the complete torque specs for the softail models . My question is when there is a range , for instance transmission drain plug , 14-21 ft. Lbs , is it best to stay in the middle of that range or stay up towards the top of the range . 14-21 is or seems to be a big difference . Keep in mind this is the one

Torque is a measure of the ability of a force to cause twisting or rotation. It is measured in "pound-feet" units of force times the distance from the axis of rotation. It takes torque to launch a vehicle and get it moving; horsepower is what gives the vehicle higher mph or top-end speed. --Special thanks to the AHDRA. HORSEPOWER & RPM
