Data Management for Amazon Web Services | Informatica India

CTA had a goal to collect and integrate data from multiple government and nonprofit agencies to match people in need with available housing and

human services. CTA used Informatica Intelligent Cloud Services to connect silos of data, enabling agencies to access and enter data via CTA's HOME app. Data about clients, housing, and services was fed into a data lake hosted on AWS (using Amazon EC2, S3, and RDS), where it could be used for analytics and reporting.
