This book is available under the terms of the Creative Commons Attribution-ShareAlike 2.0 license.

Linux Device Drivers, Third Edition [LWN.net]

Linux has a monolithic kernel. For this reason, writing a device driver for Linux requires performing a combined compilation with the kernel. Another way around is to implement your driver as a kernel module, in which case you won't need to recompile the kernel to add another driver. We'll be concerned with this second option: kernel modules.
