The making of the industrial landscape (Book, 1982 ...

Infrastructure is a book about all the stuff that people have built on the landscape we live in—the machinery that supplies us with raw materials, food, water, and energy, and the networks of roads, rails, and communications lines that hold civilization together. This is a nature guide to everything that isn't nature.

Infrastructure: A Guide to the Industrial Landscape

It developed as a manufacturing area before 1700, producing glass and iron goods, but it was not until the 18th century, partly through the influence of John Wilkinson, that large concerns began to forge the landscape.
