For using the sample data, the Pearson correlation coefficient is denoted by the letter "r". The formula for Pearson correlation coefficient  $r$  is given by: Where,  $r$  = Pearson correlation coefficient.  
 $x$  = Values in the first set of data.  $y$  = Values in the second set of data.  $n$  = Total number of values.

## **Pearson Correlation Formula- Pearson correlation ...**

The Pearson correlation coefficient is symmetric:  $\text{corr} ( X, Y ) = \text{corr} ( Y, X )$ . A key mathematical property of the Pearson correlation coefficient is that it is invariant under separate changes in location and scale in the two variables.
