household income through remittances, it should be recognised that migration has also negative impacts which adversely reverse the positive gains. This research was designed to investigate the effects of transnational labour migration on

Transnational labour Migration and Food Production in ...

The need for foreign exchange earnings together with the pressure to relieve domestic unemployment are two principal reasons for the promotion of transnational labour migration by labour-sending countries (Wickramasekera, 2002: 8). The potential of reaping positive economic benefits from international migration is immense for poorer countries.

Transnational Labour Migration, Debts and Family Economics ...

Home to 60% of the world's population, Asia has been the most important site of transnational migration in the past decades. Much of transnational mobility in and from Asia takes the form of short-term contract labour migration, which traces its origins to the contract coolie system of the colonial era (Massey et al., 1998, p. 181). The majority of Asian migrant workers are in the prime of their reproductive lives, leaving families including children behind in home countries.

Abstract This paper reviews the literature on remittances in the context of forced displacement. The evidence suggests that remittances are often affected, and affected more strongly, by factors in the displacement context that are different from factors in other contexts, such as 'economic' migration. These factors include the possibility of continuing or new conflicts in the region of ...

Human migration is the movement of people from one place to another with the intentions of settling, permanently or temporarily, at a new location (geographic region). The movement is often over long distances and from one country to another, but internal migration is also possible; indeed, this is the dominant form globally. People may migrate as individuals, in family units or in large groups.
